

# OptumRx Vigilant Drug Program

## Me Too strategy

Thousands of medications are available today with even more entering the market — sometimes at a higher cost without additional value. OptumRx can help ensure that your pharmacy benefit dollars cover only the most clinically appropriate and affordable medications.

**Me Too strategy\*** — Excludes new medications with similar composition to existing medications with no additional advantage.

\*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.

Effective January 1, 2020
